

Dear all,

Because several websites all over the world published this link to get the dutch PDF with pictures and the report about the Sloth Bear eating the monkey, I got a warning from my provider for exceeding data-bandwidth with approx. 60GB. Costs me a lot of money I do not have...

It is possible to receive the PDF but I have to charge a small fee, also than I know that I am not busy sending the PDF all day to those who just like to see horrible pics. I have included several extra shots not published anywhere and translated the text covering the whole story into English.

If you use this [Paypal](#) link to donate a small fee you will be redirected to the PDF. I will donate the biggest part to a (ape) charity fund www.stichtingaap.nl

Please understand this way of handling. If you are not satisfied I only can offer your money back.

Kind regards,
Marco Barelds
